

Service restoration

We are pleased to announce that our school vaccination programme has resumed and we will be continuing with immunisations in schools and community clinics

NHS Foundation Trust

Cumbria School Aged Immunisation Service

Our Immunisation Teams are the primary provider for delivery of the National Immunisation Programme for school aged children whether they attend school, alternative settings, home educated or not in education. We work closely with schools in Cumbria to ensure as many young people as possible are protected from vaccine preventable diseases.

What we offer:

- Nasal Flu Vaccine to all primary school aged children and Year 7 pupils
- Human Papillomavirus (HPV) Vaccine to Boys and Girls in Year 8.
- Diphtheria, Tetanus and Polio vaccine and Meningitis ACWY Vaccine to all Children in Year 9.
- We also offer a catch-up service for children who may have missed any of their vaccinations from the school aged programme.

How to access the service:

If your child is in school and due their vaccination, we will automatically send out a consent form with your child via school/educational establishment or by post.

If your child doesn't attend school and we have their details, we will send out a consent form and return envelope to their home address when their vaccination is due. Once we have the returned form, we will contact you to arrange a clinic appointment.

If you are unsure if a child or young person requires a vaccination, please contact the relevant team below.
